# CONFINED SPACE ENTRY MOBILE TRAINING UNIT

## Taking Safety Training Directly to Employees at Risk

TEEX, a leader in hands-on safety training, now delivers confined space entry training to any location, using a unique, self-contained mobile training unit. The mobile facility contains two types of confined spaces, an 8x7x5-foot rectangular space and an 18.5-foot, 42-inch tunnel. Simulated hazards, including smoke, darkness, flashing lights and loud sounds, add to the realism of the training environment. Employees will learn first-hand how to perform confined space entry safely under a variety of scenarios, while complying with OSHA and other safety standards.

On-site confined space entry training can be customized for a variety of organizations and industries. Additional simulated hazards for specific industries might include high voltage electricity, water or other liquids, enclosed machinery, lack of oxygen and poisonous or explosive gases. Reduce your company's liability, save money and reduce employee travel and lodging costs by scheduling a class at your location.

### Courses Offered

WWW202 Confined Space Entry (20 hours)

NOTE: Curriculum approved for 20 hours of Water/Wastewater and Backflow Prevention Assembly Testing (BPAT) TCEQ training credits.

### Audience

- Cities and Municipalities
- MUD & River Authorities
- Private Industries
- Chemical/Petrochemical Facilities
- Regulatory Agencies
- Environmental Professionals

### Mobile Training Facility & Equipment

The 38-foot, self-contained mobile confined space entry unit can accommodate up to 16 students per class. The facility is equipped with three video cameras with recorders, a sound system and smoke machine as well as three strobe lights.

Training equipment includes:

- 5 Scott SCBAs
- 9-foot Tripod
- 12 Body Harnesses
- 4-cylinder Air Cascade System
- 4 Gas Detectors
