# CYBER SECURITY AWARENESS

## ONLINE TRAINING COURSES

DHS/FEMA Certified Cyber Security Awareness Online Training courses are designed to ensure that the privacy, reliability, and integrity of the information systems that power our global economy remain intact and secure. Ten courses are offered through three specific tracks for the non-technical computer users, business managers/professionals, and technical Information Technology (IT) professionals. The General/Non-Technical Track addresses the basic principles and practices that computer users need to keep themselves safe at work and at home. Additionally, it includes the ethical and legal practices affecting all computer users. The Managers and Business Professionals Track provides training in implementation and management of a business information continuity plan, assessment and mitigation of cyber vulnerabilities, and incident response and analysis. The Technical/IT Professional Track is intended for students with technical knowledge of computers, operating systems and networks. These courses train users to secure computers, applications, and networks. Training in the basics of digital forensics is also provided.

These courses are offered at no cost and students earn a DHS/FEMA Certificate of Completion and Continuing Education Units (CEU) for the completion of each course.

### Course Topics by Track:

#### General / Non-Technical Track

- Information Security for Everyone (AWR-175-W)
- Cyber Ethics (AWR-174-W)
- Cyber Law and White Collar Crime (AWR-168-W)

#### Technical / IT Professional Track

- Information Security Basics (AWR-173-W)
- Secure Software (AWR-178-W)
- Network Assurance (AWR-138-W)
- Digital Forensics Basics (AWR-139-W)

#### Managers and Business Professionals Track

- Business Information Continuity (AWR-176-W)
- Information Risk Management (AWR-177-W)
- Cyber Incident Analysis & Response (AWR-169-W)

### Training Level:

Awareness

### Course Length:

Each varies: 4 to 13 hours

### Participant Audience:

- Any person who operates a computer in a private, business, or government network.
- Business owners/operators
- IT professionals
- Emergency managers
- Business continuity professionals

### Venue:

Internet

([www.teexwmdcampus.com](http://www.teexwmdcampus.com))

**Prerequisites:** None

### Continuing Education Units:

Each varies: 0.1 to 1.0 hours

**Certificate:** TEEX/DHS certificate of completion after completion of examination.
